- In the recent order dated 7<sup>th</sup> August, 2014 passed by the Appellate Tribunal for Electricity (APTEL) in Appeal No. 131 of 2013 in the matter of Vianney Enterprises, Versus Kerala State Electricity Regulatory Commission & in the said case the APTEL has held that the arrears for difference in tariff could be recovered from the date of detection of the error only. Later the same has been admitted by the Commission also.
- KCT is squarely applicable to the applicable to the case of and the arrears can be recovered only from the date of detection of the error, i.e. in KCTs case November, 2014 .

**No Retrospective recovery of arrear can be allowed on the basis of any abrupt reclassification of consumer even though the same might have been pointed out by the Auditor.** Any reclassification must follow a definite process of natural justice and the recovery, if

any, would be prospective only as the earlier classification was done with a distinct application of mind by the competent people. The same cannot be categorized as an escaped billing in the strict sense of the term to be recovered retrospectively.

*Regulation 13 of the Supply Code Regulations provides as under:*

*Classification and Reclassification of Consumers into Tariff Categories: - The Distribution Licensee may classify or reclassify a consumer into various Commission – approved tariff categories based on the purpose of usage of supply by such consumer:*

*Provided that the Distribution Licensee shall not create any tariff category other than those approved by the Commission.*

*After the tariff order dated 16<sup>th</sup> August, 2012 in Case No. 19 of 2012 of the Commission, the Respondent was required to change the tariff category of the Appellant from LT-VA Industrial to LT-II Commercial and charge the Appellant accordingly. It is the responsibility of the Respondent to apply proper category as per the tariff order of the Commission as per the above Regulation 13 of the Supply Code Regulations.*

*The Respondent stated that order dated 11<sup>th</sup> February, 2003 in Case No 24 of 2001 is not applicable to the Appellant as the said order is prior to the commencement of the Electricity Act, 2003. According to the Respondent, that case was related to infrastructure facilities being provided by MIDC. Even it is assumed that facts of the said Case No. 24 of 2001 are not different, yet, the principle laid down by the Commission that recovery should be prospective applies to this case of the Appellant. Moreover, the judgement dated 7<sup>th</sup> August, 2014 of the APTEL in Appeal No. 131 of 2013 is squarely applicable in the present case. APTEL has held that arrears of difference in tariff category would be recovered only from the date of detection of the error. In this case, the error was detected on 20<sup>th</sup> March, 2014. Therefore, the change in tariff category from LT-V A Industrial to LT-II Commercial should be made applicable to the Appellant from March 2014 and arrears should be recovered accordingly.*

*The Representation is thus allowed. The Respondent is directed to recover arrears from the Appellant from billing month of March, 2014 without applying DPC and interest on the said arrears. The arrears already paid by the Appellant should be adjusted and balance amount be recovered from the Appellant.*

*Since there is no merit in the petitions, the same are dismissed with no order as to costs.”*

*HT VI: Bulk Supply Applicability*

*Applicable for consumers taking supply at HT voltages at single point for consumption within HT Residential Complexes, viz., Group Housing Societies, Colonies of industrial consumers and educational institutions, Government and Private Pure Residential Housing Colonies, Government and Private Mix ( Residential + Commercial) Housing Colonies and Commercial Complexes only. Rate Schedule*

Consumer Category	Demand Charge (Rs./kVA/ month)	Energy Charge (Rs./ kWh)
<i>HT VI Bulk Supply</i>		
<i>Group Housing Society</i>	160.00	4.82
<i>Commercial Complex</i>		8.21

*Note:*

*i. Demand Charges as above will however be applicable only when the power supply to such Residential/Commercial Complexes is given through independent point of supply. In case of mixed complexes, use of sub-meters is essential for arriving at energy charges for type of category. HT VI Tariff will be applicable only for Group Housing Societies and Colonies of industrial consumers and educational institutions.*

*The sub-distribution of electricity to others through sub-meters is not permitted as per law and also causes heavy revenue loss to MSEDCL. Due to continuance of power supply through sub-meters, the occupants/tenants avoid taking new connections and it causes loss in energy charges, security deposit and service connection charges.*

**Para 11- Individual Residential Consumers taking Supply at HT Voltage:** *Individual residential consumers taking supply at HT voltage (large bungalows) will be charged at LT residential rates, since there is no HT residential Tariff category- Further, HT VI Group Housing Society Tariff is also applicable for such Housing Colonies of industrial consumers or educational institutions, taking supply at HT with separate sub- meter, irrespective of whether metering is at HT side or LT side of the transformer so long as the supply is at HT voltage. HT VI Group Housing Society tariff is not applicable to Co&op Housing Societies*

**Para 12. Tariff to Commercial Load of Industrial Consumers or Educational Institute:** *For commercial load (other than ancillary and incidental activities mentioned in Sr.NO.10(e) above) of industrial consumers or educational institutions taking supply at HT voltage with separate sub-meter, the HT II Commercial category Tariff will be applicable, irrespective of whether metering is at HT side or LT side of the transformer. The HT VI Commercial category Tariff will not be applicable in such cases, since the same was intended to be only an interim solution, since all such commercial category consumers taking supply at single point have to be converted either to franchisee or individual connections, in accordance with the detailed rationale given by the Commission in previous Tariff Orders. This provision needs to be implemented scrupulously.*

#### 5.4 Commission's Tariff Philosophy

*Further, it is clarified that the consumer categorisation should reflect the main purpose of the consumer premises. For instance, within a Factory, there could be canteens, recreation rooms for staff, gymnasium, time office, creche for employees' children, dormitory for workers, guest houses for visiting officers, etc., which are related to an incidental to the main purpose of the factory premises, and are intended for use by the staff/workers employed within the factory premises, and are not offered on commercial payment basis to people not employed within the factory premises. The factory cannot function in the absence of such ancillary*

activities. In such cases, the categorisation of such consumers should be 'Industrial' and the distribution licensee should not install sub-meters or separate meters for such ancillary and incidental activities, and charge them at commercial or any other rate, as has been done in some cases. On the other hand, if there are full-fledged employee quarters spread across one or more buildings, wherein the employees employed in the factory are given accommodation, then the supply to such premises should be metered separately through a sub-meter, and such premises should be charged at appropriate HT residential or LT residential tariffs, depending on the level of metering. It should be noted that all previous clarifications given by the Commission through its various Orders continue to be applicable, unless they are specifically contrary to anything that has been stated in this Order, wherein the clarifications given in this Order shall prevail.

*2.2.5 MSEDCL shall not permit any Applicant / Consumer to have two or more independent power supply connections for an identical purpose in one common premise. In case the Applicant /Consumer intends to use the power supply in a common premise for two different purposes, like Domestic along with Non – Domestic or General Motive Power along with Non – Domestic, etc.;; the Applicant / Consumer may separately apply for independent power supply for each of such purposes, which the MSEDCL may permit provided release of such two connections to one common premise for different purposes is found technically feasible.*
