“no billing using past consumption or some related 'average' basis should be resorted to for more than a period of 3 months. (Where average billing has been continuing for more than that period just prior to 1st June, 2004, then it cannot be continued from that date. In case average billing has been resorted to for, say, 2 months prior to that, it can be continued only for upto one month more). During that period of 3 months, the meter should have been tested/ replaced, with the results intimated to the consumer, and appropriate bill adjustments carried out thereafter (where such average billing is being done on the basis of presumed faulty meter, and where defectiveness of the meter has accordingly been established). If due and timely diligence has not been exercised by the licensee, he cannot claim the right to continue billing on a presumptive, average basis. The same principle will apply to

all other situations in which such 'average' billing has been resorted to, except in cases where the meter is not accessible. (However, the Commission notes that, in the case of locked/ inaccessible meters, the licensees have recourse to the remedies provided under Section 163 of EA, 2003, and it would be expected that MSEB would exercise it sooner rather than later.”

; k funi kkaæk. ksforj . k dia uhyk 3 efgU; ki skk vf?kd dkGkl kBh l jkl jh ns dsnrk ; r ukghr- ; kl ca/kh egkj kVajkT; fo| r forj . k dia uhuns[khy ijhi =d Ø- 50 P.COM./ACCTT./AVERAGE BILL/27608 Dated, 22/08/2006 e/khy l puk [kkyhy iæk. ks vkgr%

“It is therefore, decided that in those cases where meter is not faulty and is in working condition for taking the reading, the average bill beyond one billing cycle should not be issued in future. If reading is not provided by the meter reader and some wrong status is given, on the stipulated date for preparation of the bill and average bill is issued then the decision has been taken that the difference between the billing as per actual reading and average bill should be recovered from the salary of the concerned meter reader.”
