**ORDER PASSED ON 31.05.2019**

1) The applicant approached this Forum under clause 6.4 of the Maharashtra Electricity Regulatory Commission (Consumer Grievances Redressal Forum & Electricity Ombudsman) Regulations 2006, since his claim for compensation for delay in releasing new electric connection of 5 HP for Agricultural Pump is rejected firstly by the Commercial Manager and thereafter by IGRC vide order dated 05.04.2019.

2) The applicant is a cultivator having landed property bearing Survey No.35 admeasuring 1H 60R at Mouza Sirasgaon in Hinganghat Tahsil of Wardha District. On 01.02.2018 he applied to the Distribution Licensee for grant of new electric connection of 5 HP Agricultural Pump by conventional mode i.e. under High Voltage Distribution System (HVDS). He received Demand Note from Non-applicant on 12.03.2018. He then credited the requisite amount on 03.04.2018. On the same date Test Report is submitted. However, the new electric connection for taking irrigated crop from the adjacent river water is not released till today. He, therefore, approached IGRC on 08.02.2019 seeking compensation for Rs.15000/- for delay in releasing the electric connection, Rs.10,000/- for physical & mental harassment, Rs.3000/- towards travelling expenses & Rs.2000/- for court expenses.

3) IGRC vide order dated 05.04.2019 rejected the claim as barred by limitation by virtue of the provisions of clause 12.2 of MERC Regulations 2014, since he failed to approach IGRC within 60 days from the date of accrual of cause of action i.e. on or before 03.09.2018, when he in fact approached on 08.02.2019. However, a direction is issued to provide new electric connection under Chief Minister's Solar Energy Scheme.

4) Aggrieved by the aforesaid order the applicant approached this forum in the present Grievance Application on 15.04.2019.

5) On notice the Non-applicant appeared and vide reply dated 24.05.2019 resisted the claim and supported the stand taken before IGRC and the order passed by the said authority. A reference to State Government Resolution dated 15.11.2018 and 01.01.2019 is also made under which new electric connection to the farmer consumers is to be granted under Solar Energy Scheme.

6) On 28.05.2019 when the matter was called out for final hearing, heard Shri B.V. Betal the authorized representative of the applicant and the reply arguments of Shri H.P. Pawade, Executive Engineer, Hinganghat Division. We have carefully perused the case record.

7) It is obvious that there is no facility of well irrigation in the field of the applicant, hence he applied for new electric connection for getting water from adjacent river Yashoda. It is true that as per clause 4.8 of MERC (SOP) Regulations 2014, after submitting application, new electric connection should be released within 90 days from the date of deposit of Demand Note amount, i.e. till 03.07.2018 in the present case. As such cause of action to claim compensation arose thereafter for delay in granting the electric connection. As per rules 60 days period was available to the applicant to approach IGRC i.e. till 03.09.2018 to claim

compensation. However, as stated earlier he approached on 08.02.2019. As such the claim for compensation is rightly rejected by IGRC as barred by limitation.

8) It is, however, obvious that since the applicant's application for grant of new electric connection is pending, it will have to be considered. However, in the mean time the Government took a decision to grant Solar Energy Connection only and not by conventional mode under the Two Government Resolutions referred above. There is, however, one exception under the aforesaid Government Resolutions to the effect that, if the amount of Demand Note is credited before 31.03.2018 and for conventional mode H.T. cable is required to be erected for a distance upto 600 mtrs. only till the agricultural field of the consumer, in that event only new electric connection by conventional mode should be granted. In other words, in all other cases Solar Energy Connection only should be granted.

9) As stated by the applicant during hearing he intends to take the Solar Energy Connection for lifting the river water and to carry it to his field, since there is no well facility. However, for this purpose as stated by the Non-applicant the area of the river bed will have to be excluded and the panel for Solar Energy Connection can be installed only across the river bed and in case the

field of the consumer is not immediately adjacent to the river consent of other field owners for laying a pipeline from the panel of Solar Energy Connection through the portion of their fields also will have to be obtained. Since Solar Energy Connection only can be granted the applicant will have to comply with the necessary formalities.

10) During the course of arguments the applicant's representative submitted that a direction be issued to the Non-applicant to give undertaking to pay the damages in the event of causing loss or damage to solar panel due to river flood or by any Vis-Major (Act of God). However, in this respect it is submitted on behalf of the Non-applicant that on erection of solar panel it will be insured, with 5 years Guarantee for equipments and 15 years free maintenance of solar panel. It is stated that the MSEDCL will bear the requisite amount of premium and the consumer is not required to pay anything. So the interest of the consumer is sufficiently protected through the insurance cover to make good any loss to the solar panel, in the event any damage is caused for any reason.

11) From the above discussion, it is crystal clear that the applicant has no case for seeking compensation and Non-applicant is rightly directed to consider his case for grant of Solar Energy Connection as per rules as directed by IGRC. The applicant is also to submit online application to the Non-applicant for grant of Solar Energy Connection and the amount of Demand Note for

conventional mode already credited by him shall be adjusted towards the Demand Note of Solar Energy Connection to be issued to the applicant on completion of necessary formalities.

12) The Grievance Application is, therefore, dismissed, however with the aforesaid directions.

13) Parties to bear their respective costs.
