CIRCULAR NO-17

Sub: Guidelines regarding issue of new connection A1 against Bulk application B1 for infrastructure

---

Now days, the new connection A1 for flats/complexes under bulk application B1 for infrastructure are issued in the name of Builder in bulk quantity. Further, it is noticed that the premises of flats/complexes are not in use for number of months till occupation by flat owners. This causes zero billed consumption of these consumers and the manpower used for billing verification of these consumers get wasted. The Competent Authority directed that the New connections A1 against any B1 application should be issued in the name of individual owner at the time of possession of the flat.

In this regards, the new service connections A1 against bulk application B1 must be issued only in the name of owners. New service connection A1 against bulk application B1 in the name of builders are not to be allowed, hereafter.

All field offices are requested to follow above instructions and guidelines scrupulously. The copy of circular is available on www.mahadiscom.in
